

At Triplenine Group we have a combined experience of over 30 years in industry providing 3D modelling and drawings to our clients. We have in house capacity to provide a range of drawings from detailed fabrication drawings to entire plant facility models.

Detailed drafting and modelling is provided to our client through the use of over than 20 software design packages, each tailored to a specific use or industry.

Modelling –

All stakeholders will have access to review and comment on 3d models. Models can be viewed on pc's as well as tablets and smart phones.

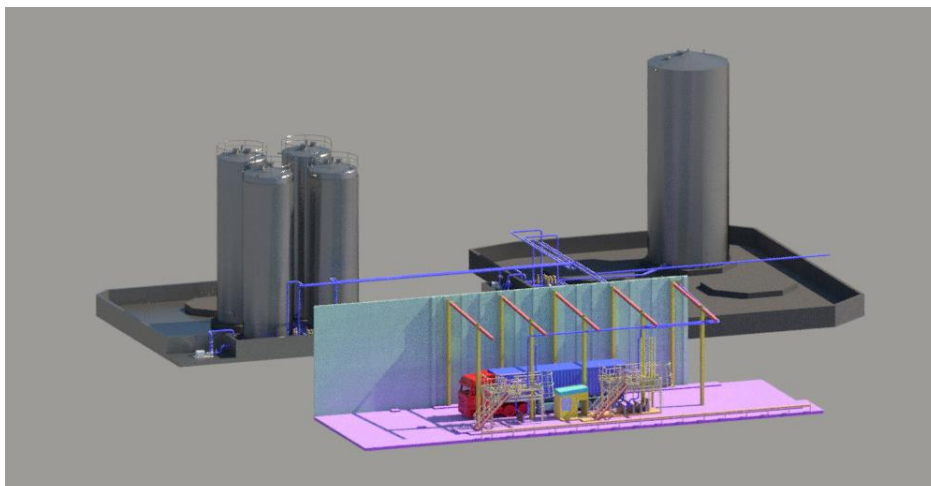

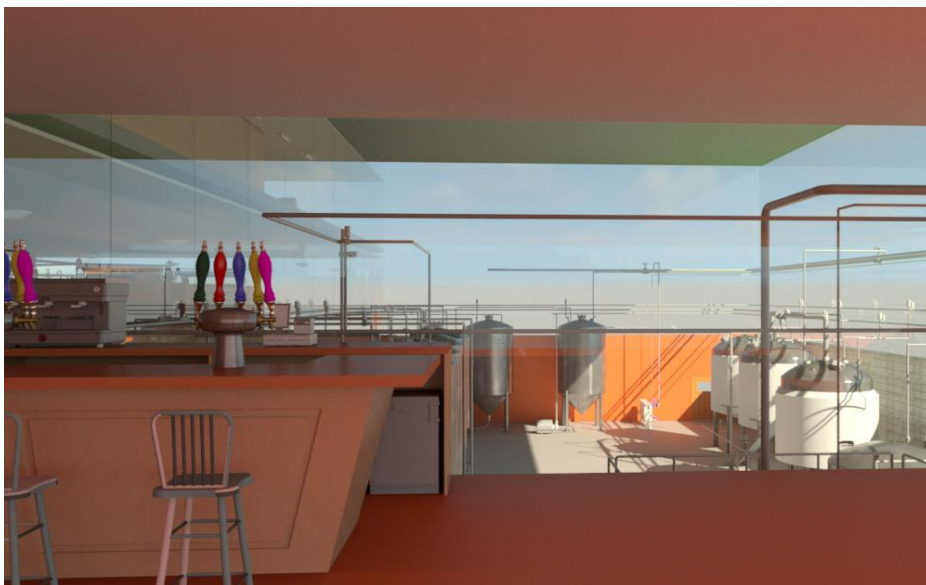

3D scanned model shown in BLUE, all other coloured items were installed new

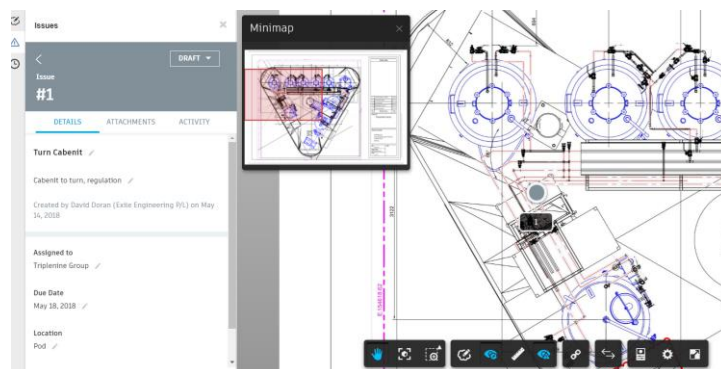

Completed project installation, manifolds were prefabricated then installed during a shutdown

Rendering

Markups – Issues

- Through the use of our bim management software each stakeholder has the availability to create markups to drawings as well as create issues within the drawings. These issues can then be assigned to the correct contractor to resolve.

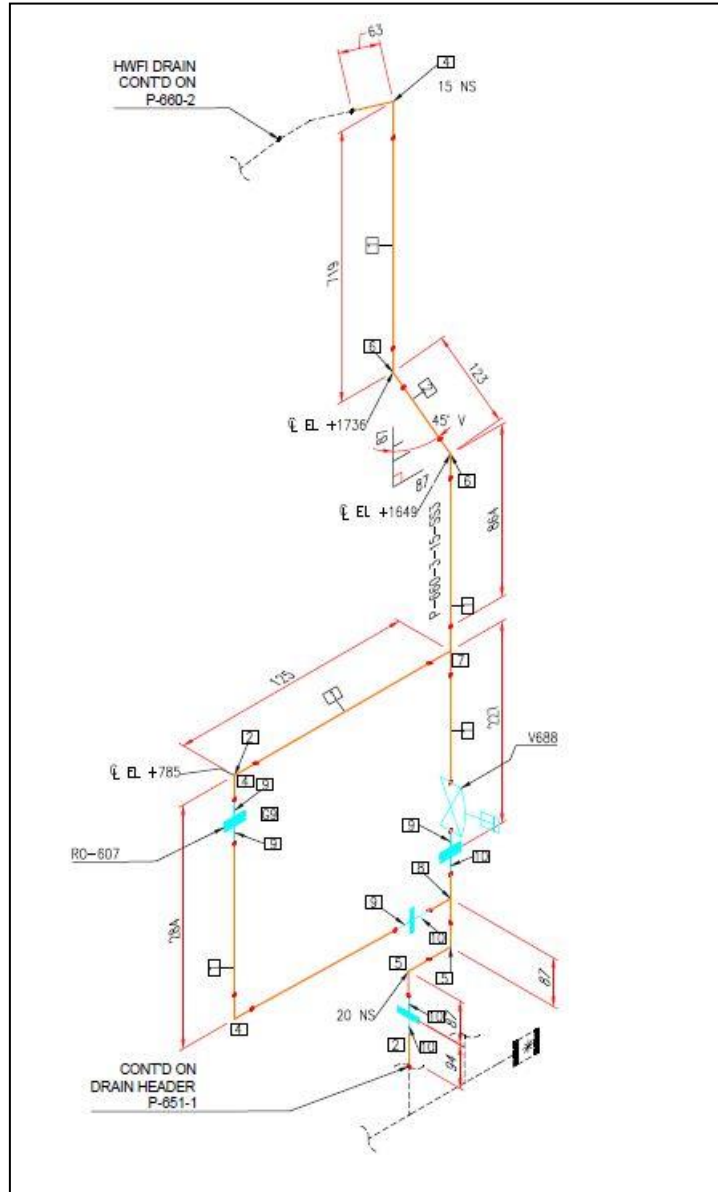

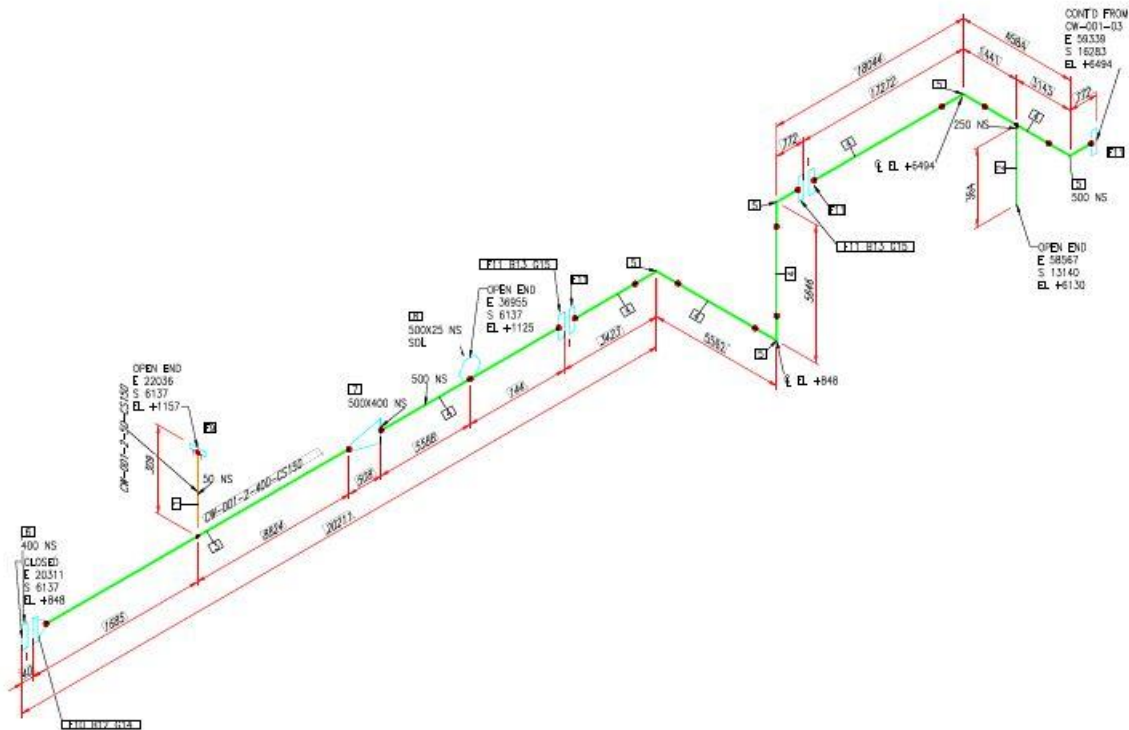

- Issues and markups can also be added to 3d models as shown below.

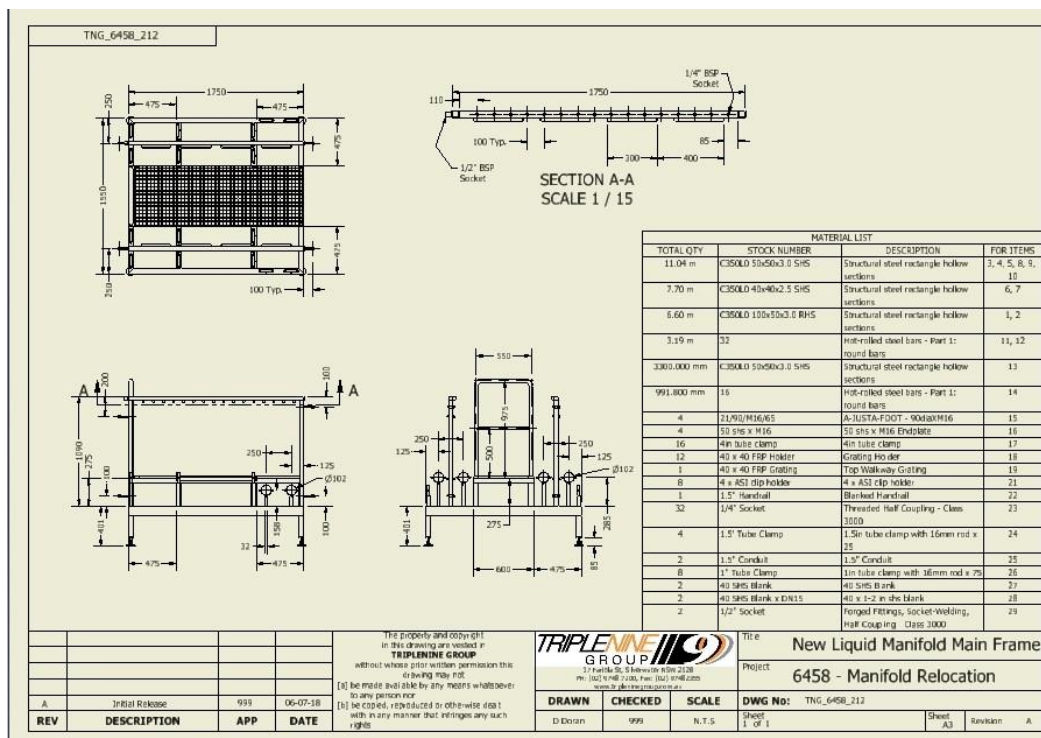

Fabrication Drawings

- Fabrication Drawings will be provided to all trades for fabrication of items and placement of equipment.

- Typical Isometric drawing

- Typical fabrication drawings
